**18 cms**

Thank you for contacting us!

Gyro Technology spins any camera video around a central platform creating a 360 degrees view.

While guests stand on a platform, a camera attached to a metal arm turns automatically around them.

The result is a stunning video that looks like a cinema scene.

The installation takes few minutes.

The possibilities where you can use it are endless:

- Events
- Cinema and TV recordings.
- Marketing and branding.
  - Sport experiences.
- Weddings and private parties.
